To Whom It May Concern

I would like to commend Constantine Sebok for the fine work that he did at the Vestibular Rehabilitation Conference this past weekend. He takes his job very seriously and was the best audio/visual person that I've worked with as I've traveled across the country. He was meticulous about making sure that everything looked right, and that I was happy with the end product that was on the screen.

He is highly skilled as he was able to move all the equipment from one room to another within an hour when we had to change rooms because of a wedding. I was very impressed with his skills and his demeanor.

I highly recommend him for future jobs.

Sincerely,

A handwritten signature in blue ink that reads "Susan L. Whitney".

Susan L. Whitney, PhD, PT, ATC
Assistant Professor
Department of Physical Therapy
